

Subject: Adopting the Nordic model in our focus countries

Dear Mr. Svoboda,

Regarding the social improvement project our organization is working on, I have finished my report for the Nordic model and I would like to adapt the system to our focus countries in Africa.

From my research, I have found that the Nordic model has created a stable economic environment and a sustainable welfare system for the country of Denmark, Finland, Norway, and Sweden. They all have a high life expectancy, a highly educated workforce, a service-based economy, a low rate of unemployment, and a low level of homelessness. Those achievements could partially be attributed to the widespread digitalization in society. In short, this model could greatly improve the standard of living in our focus countries, where the situation is dire and urgently needs improvement.

However, the report and the subsequent fieldwork have some limitations, such as inadequate analysis of economic performance, due to budget constraints. I would like to apply for more funding to further continue the research. This project has the potential to save millions of lives.

Thank you very much for your support. I look forward to your reply.

Sincerely,

Andrew
